Office Action Summary

Application No.

09/157,697

Applicant(s)

BYRISETTY ET AL.

Examiner

Paul H Kang

Art Unit

2141

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 May 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10,12-21,23-25 and 27-30 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10,12-21,23-25 and 27-30 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 22.
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: _____.

Art Unit: 2141

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 10, 20 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Larson et al., US Pat. No. 5,907,324 in view of Okanou et al., US Pat. No. 6,240,089 B1.
3. As to claims 1, 10, 20 and 25, Larson teaches a client computer and a computer readable medium comprising a processor, a computer-readable medium, and a computer program (Larson, col. 4, line 60 – col. 6, line 19) executed by the processor from the medium to query a first server (col. 9, lines 10-47), disposed to manage data of a first type, to obtain conferences maintained by the first server and a list of users maintained by the first server (col. 9, lines 10 – col. 10, line 60; list of conferences and users, as well as other conference characteristics, are obtained through the Browser 82) and to query each server on the server list to learn of at least one conference maintained by each server on the server list (col. 9, lines 58 – col. 10, line 60; the Planner and Persistent Conference Manager allow the user to link to the specific conference to obtain further details about the conference).

However, Larson does not explicitly teach two servers, a first type of server for maintaining a conference and a list of users and a second type of server to maintain a list of the first type of servers. In the same field of endeavor, Okanou teaches maintaining a first type of servers disposed to manage data of a first type and a second type disposed to store a list of the

Art Unit: 2141

first type (Okanoue teaches a participation group table comprising those hosts having active sessions; col. 13, line 51 – col. 14, line 33).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated multiple server conference tracking as taught by Okanoué into the conferencing system of Larson for the purpose of enhancing the management and identification of conference groups.

4. Claims 2-4, 7, 15, 17, 21 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Larson-Okanoue in view of Meubus et al., US Pat. No. 6,185,565.

5. As to claims 4, Larson-Okanoue teach the invention substantially as claimed. However, Larson-Okanoue does not explicitly teach the use of an internet locator service (ILS) type of server. In the same field of endeavor, Meubus teaches the use of an ILS server (Meubus, col. 8, line 49 – col. 9, line 6). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated the ILS server as taught by Meubus into the system of Larson-Okanoue for the purpose of enhancing system efficiency by implementing a dynamic directory structure.

6. As to claims 2, 3, 7, 15, 17, 21 and 27, Larson-Okanoue-Meubus teach maintaining a user list through use of conference objects having addresses and connection status (Larson, col. 1, line 65 – col. 2, line 67).

Art Unit: 2141

7. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Larson-Okanoue-Me in view of Lister et al., US Pat. No. 6,167,446.

8. As to claim 5, Larson-Okanoue-Meubus teach the invention substantially as claimed. However, Larson-Okanoue-Meubus does not explicitly teach the use of a NT Directory Server (NTDS). In the same field of endeavor, Lister teaches the use of an NTDS (Lister, col. 9, line 62 – col. 10, line 23). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated the NTDS as taught by Lister into the system of Larson-Okanoue-Meubus for the purpose of implementing a widely known and used server into the network.

9. Claims 6, 8, 9, 12-14, 16, 18, 19, 23, 24, 28 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Larson-Okanoue-Meubus-Lister in view of Kumar, US Pat. No. 6,163,531:

10. As to claim 9, Larson-Okanoue-Meubus-Lister teach the invention substantially as claimed. However, Larson-Okanoue-Meubus-Lister does not explicitly teach the use of Session Description Protocol (SDP). In the same field of endeavor, Kumar teaches the implementation of SDP in a distributed conferencing system (Kumar, col. 5, line 26 – col. 6, line 67). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated the SDP as taught by Kumar into the conferencing system of Larson-Okanoue-Meubus-Lister for the purpose of efficient management of conferencing properties and

Art Unit: 2141

information.

11. Claims 6, 8, 12-14, 16, 18, 19, 23, 24, 28, 29 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Larson-Okanoue-Meubus-Lister-Kumar in view of DeSimone et al., US Pat. No. 6,138,144.

12. As to claim 19, Larson-Okanoue-Meubus-Lister-Kumar discloses the invention substantially as claimed. However, Larson-Okanoue-Meubus-Lister-Kumar do not explicitly teach the use of ILS and NTDS. In the same field of endeavor, DeSimone teaches the use of ILS and NTDS (DeSimone, col. 7, line 36 – col. 8, line 60 and Lister, col. 9, line 62 – col. 10, line 23). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated the use of ILS and NTDS into the conferencing system of Larson-Okanoue-Meubus-Lister-Kumar for the purpose of implementing the system using a widely used and accepted for their reliability and stability.

13. As to claims 6, 8, 23, 24 and 28, Larson-Okanoue-Meubus-Lister-Kumar teaches security features for authenticating users (DeSimone, col. 7, line 13-49).

14. As to claims 12-14, 16 and 18, Larson-Okanoue-Meubus-Lister-Kumar teaches setting up a conference, determining participation of conference, querying and updating conference profiles (DeSimone, col. 3, line 55 – col. 4, line 21 and col. 4, line 65 – col. 6, line 57).

Art Unit: 2141

15. As to claims 29 and 30, Larson-Okanoue-Meubus-Lister-Kumar teach a system wherein data of the first type is dynamic and second type is static (DeSimone, col. 3, line 55 – col. 4, line 21 and col. 4, line 65 – col. 6, line 57).

16. Applicant's arguments with respect to claims 1-30 have been considered but are moot in view of the new ground(s) of rejection. The Applicant argued in substance that the prior art of record, as applied, do not teach two servers, a first type of server for maintaining a conference and a list of users and a second type of server to maintain a list of the first type of servers. The new grounds of rejection teaches this feature.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul H Kang whose telephone number is (703) 308-6123. After October 26, 2004, all calls should be placed to (571) 272-3882. The examiner can normally be reached on 9 hour flex. First Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on (703) 305-4003. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
